SCITON PHOTO REJUVENATION THERAPY

BBL™ broadband light innovative technology sets new standards for the treatment of skin conditions associated with aging, pigmentation problems from hormone fluctuations and sun damage. BBL broadband light energy allows your clinical aesthetician to precisely treat fine wrinkles, age & sun spots, small facial veins and several other skin blemishes. Your treatment will be tailored to match your skin's condition and your desired results. Please call for your consultation so we can adequately discuss treatment protocol & pricing.

SCITON BBL LASER HAIR REMOVAL

Laser Hair Removal works without damaging the surrounding skin, controlled flashes of light penetrate the skin and are absorbed by the hair follicles. The heat damages the hair and the regenerative matrix that regrows hair, and minimizes the potential for regrowth. Because of the significantly large spot size created by this unique technology, backs, shoulders, abdomens and legs can be treated quickly. Facial areas such as the lip, chin, and beard, can be treated in minutes. We can treat ANY area of the body comfortably and affordably. Please call for your consultation so we can adequately discuss treatment protocol & pricing.

INJECTABLE OPTIONS

Botox | Vollure | Voluma | Volbella | Juvederm Ultra XC | Juvederm Ultra Plus XC

KYBELLA

Consultation required for pricing and treatment plan.
